# TownVOTE

User Guide

Launch the app from the desktop.

Auto-detect the hardware. If hardware is not detected, Demo Mode will be enabled.
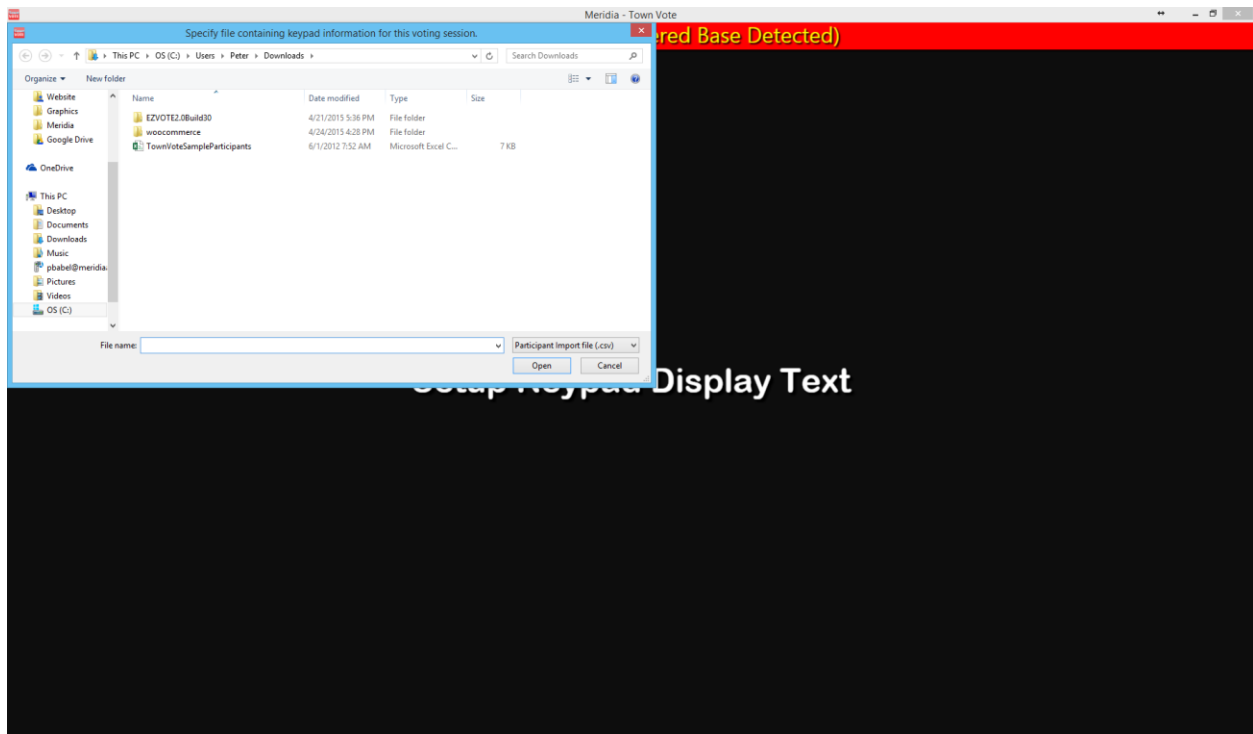

Participant List must be selected. CSV format is accepted and it doesn't have to have column headers.
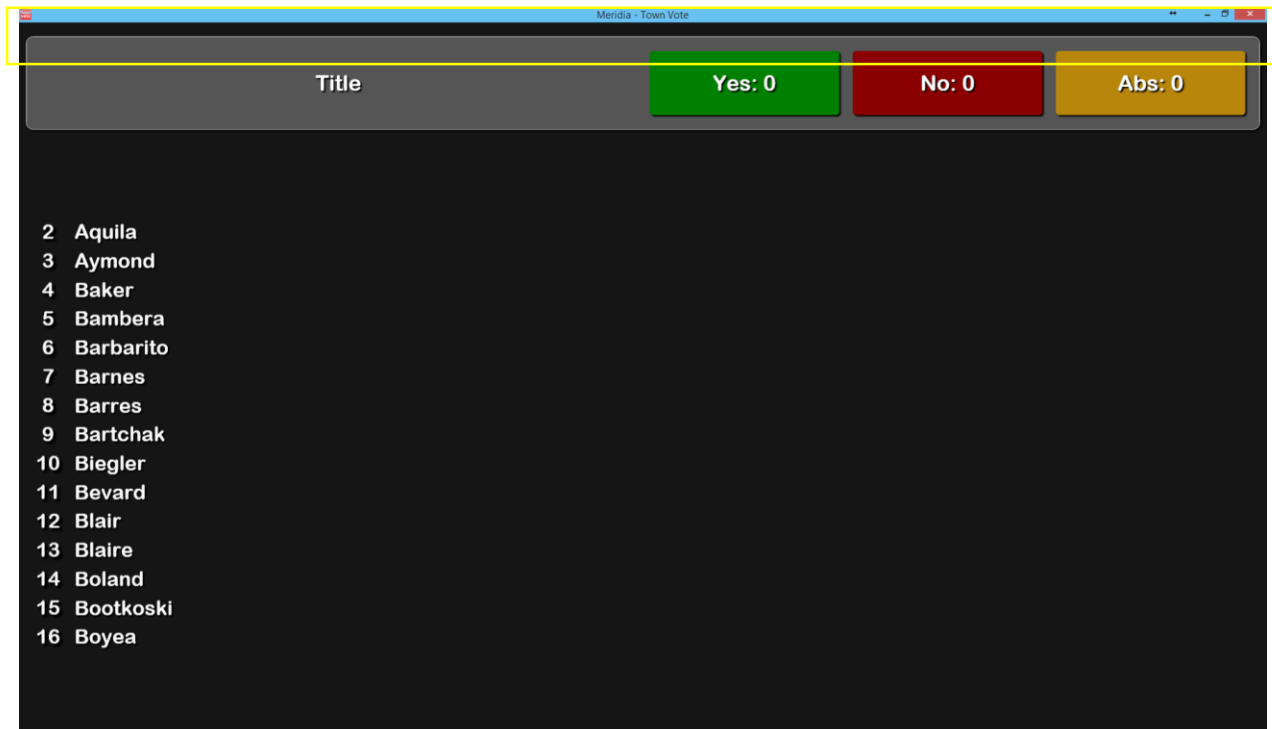

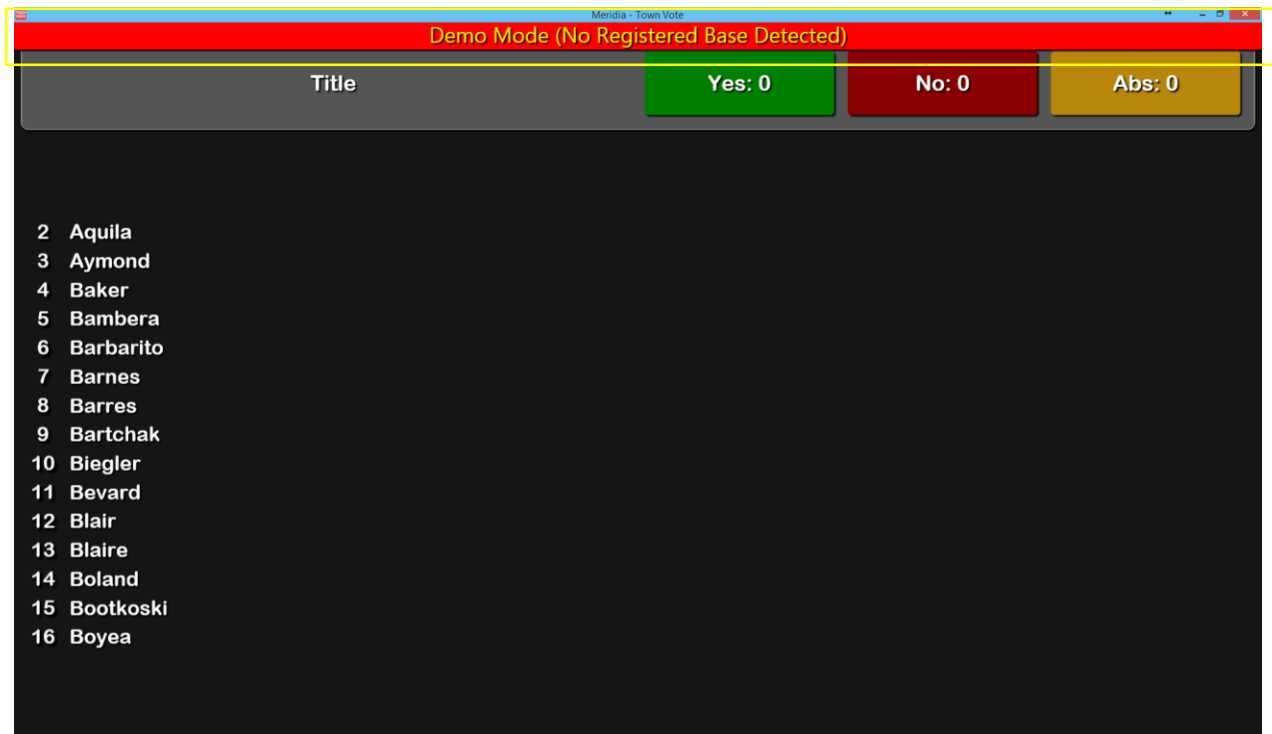

|	A	B	C
1	1	123456789_123456789_123456789_123456789_

Select the CSV file and click Open.

If Demo Mode is enabled, you can disable the message on top of the screen, by pressing Shift+D.

Open vote by pressing Spacebar.

Close vote by pressing Spacebar again.

Add columns of voters' names, press + (plus). To reduce the number of columns, press - (minus).

To navigate from one page (of names) to another, press the right or left arrow (← or →).

To toggle between Windowed and Full Screen mode, press F11.

Toggle between Absolute votes and Percentages by pressing P.

To clear the votes, press C.

Summary of keyboard shortcuts:

P	Percentage vs. Absolute Numbers
+/-	Add/remove columns
C	Clear votes
Space	Start/Stop vote
Shift+D	Toggle demo message
F11	Toggle full screen
